

Practice Management Systems and Revenue Cycle Management Systems Save Costs, Improve Operational Robustness and Security by leveraging ACA compliant Connectivity with Clearinghouses, Payers

The Affordable Care Act (ACA Sec.1104) requires Health Plans, Healthcare Clearinghouses and other HIPAA covered entities to implement the CAQH® CORE® EFT and ERA Operating Rules and the Eligibility and Claim Status Operating Rules.

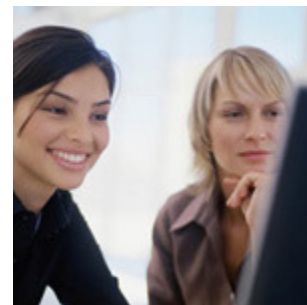

A key requirement in these rules is the Safe Harbor Connectivity and Security Operating Rules for exchanging the EDI transactions such as Eligibility, Claim Status, ERA. To comply with ACA, Health Plans and Clearinghouses must offer this form of connectivity and security to their trading partners.

Practice Management Systems that include Revenue Cycle Management functions now have the option of leveraging this uniform approach to connectivity and security to simplify their EDI and to save costs, while making EDI more robust and secure. [Learn More](#)

CAQH and CORE are the registered trademarks of the Council for Affordable Quality Healthcare.

BNETAL SureDeliver: Enables ACA compliant connections from Practice Management Systems to Clearinghouses, Payers

BNETAL solution SureDeliver® is an enterprise gateway that has a robust, secure and turnkey implementation of CAQH® CORE® Connectivity Rules, which are a key part of CAQH CORE Operating Rules which are federally mandated for HIPAA covered entities by the Administrative Simplification Provisions of ACA §.1104.

SureDeliver® provides a secure and enterprise grade implementation of the CORE Phase II, III Connectivity Rule for compliance with the requirements of the ACA, and Phase IV (new) Connectivity Rule towards the next set of transactions for which CORE Rules have been developed.

SureDeliver® can easily integrate with and augment existing revenue cycle management systems to swiftly reach compliance with connectivity requirements within the EFT&ERA, Eligibility,

Claim Status CORE Operating Rules within the Administrative Simplification Provisions of ACA §.1104.

Healthcare Providers and Vendors who serve them can augment Revenue Cycle Management Systems (or their Practice Management Systems that include Revenue Cycle Management functions) to use SureDeliver® as the CORE-compliant communication gateway; with this, Providers can conduct EDI with payers in a uniform and secure way and hence have the option of connecting to them directly and save transaction costs.
