SureDeliver®

Benefit from our ACA Compliance Solutions and Expertise!

BNETAL SureDeliver® is our turnkey solution for Affordable Care Act compliant connectivity and security (CAQH CORE Connectivity Operating Rules) for HIPAA EDI transactions. SureDeliver can help you save time, costs and risks, while improving operational robustness and security.

SureDeliver® has a ready-now, secure and robust CORE Phase IV Connectivity Rule implementation (for Claims and other transactions) in addition to Phase III and II Connectivity Rule implementations.

SureDeliver® easily integrates with your existing X12 processing, giving quick and cost effective compliance.

Supported by top-notch experts in health data exchange, security and regulatory compliance.
Learn More...

CAQH® and CORE® are registered trademarks of the Council for Affordable Quality Healthcare, an independent organization. CORE Operating Rules are developed by industry stakeholders using a transparent process. ACA Section 1104 already has language mandating use of CORE Operating Rules (Phase II and III). CORE Phase IV Rules are yet to be adopted by ACA, but are available for voluntary adoption.
